ALARM RESPONSE

Can you depend on a neighbor or passerby to call the police if your alarm is going off?

CALL US TODAY!

Who's Listening?

FOCUSED ON YOU

An alarm system is one of the few defenses your property has to be protected against burglary, fire, flood, and excessive temperature changes.

Who's really listening?

Due to the high number of false alarms, local law enforcement places burglar alarm activation signals at the bottom of their response list, and can take hours to respond. Nightwatch Security responds quickly to verify your alarm signal and promptly dispatch local law enforcement in the event of an actual emergency, resulting in decreased overall response time and ensuring that help is on scene as quickly as possible.

WHY RISK YOUR SAFETY?

Burglary situations are highly dangerous. With 24-hour alarm response services from Nightwatch Security, you will no longer have to incur the risk and inconvenience of responding to an alarm.

Nightwatch Security fields a team of radio-dispatched, uniformed alarm response agents who are trained to respond and mitigate alarm conditions.

A description of our findings is always left at the premise. A detailed report is faxed or e-mailed to the primary contact within twelve (12) hours.

CALL US TODAY!

Protect your Home, Your Family and all that's important.

Providing services customized to each client, industry, and desired outcome, Nightwatch Security is the solution which allows you to focus on other areas of your life.
